

# Contract Quality System Support

SAVANT TECHNOLOGIES

Testing laboratories have an obligation to demonstrate their competence in the tests offered as a service to their clients. Formal recognition of that competence is gained through accreditation to the ISO 17025 standard .

Savant Technologies offers contract services to accredited laboratories for the support of their quality systems. These include maintenance of controlled documentation, management of quality records systems, management of calibration schedules, auditing of the quality system, monitoring of internal and external quality control measures and collation of validation data for test methods.
